

FIRE SPRINKLER TANK

EASTERN CREEK

Project Brief:

A large under ground , concrete water tank that will be required to hold grey water. The grey water will be stored and used to supply the fire sprinklers within the warehouse.

Solution:

The concrete tanks were firstly primed with **Duromix™ WBE Hi Build** and then top coated with 2 coats of **Duro Mastic™ P15**

About the products used:

Duromix™ WBE Hi Build is a water based two pack epoxy, which was used as a priming coat to provide a moisture barrier and combat hydrostatic pressure.

Duro Mastic™ P15 is a modified acrylic urethane membrane which is suitable for use in constant immersion.
