

DUROTECH EXTERNAL CORNER

Bothe side fleece coated elastic shape for durable sealing of External corners in combination with sealing systems under tiles.

DESCRIPTION

Durotech External Corner is watertight, durable-elastic sealing. The pre-formed pieces are made from NBR-Rubber with both sided polyester fleece. This material basis causes an excellent bonding with almost any waterproofing materials used under tiles extending over the entire surface of the corner.

APPLICATION

Durotech External Corner is used as durable, watertight sealing in corners beneath ceramic layers. The External corners are embedded full surface in the sealing material.

PREPARATION OF THE SUBSTRATE:

Preparation of the grounds is done according to the sealing system used.

USE

The corner areas are first of all spread with a layer of Sealing Compound. Each corner is then placed on the fresh Sealing Compound and pressed in. When dry, the Durotech External Corners are then also covered full surface with a second layer of Sealing Compound.

TECHNICAL SPECIFICATIONS:

Thickness: 0.6mm
Temperature resistance: -20°C to +90°C

STORAGE

Durotech External Corner can be used for a period of at least 24 months when stored in a cool and dry place.

INFORMATION ON FURTHER PROCESSING:

Durotech External Corner is absolutely silicone-compatible; a soaking must not be expected. Solvent-free adhesives and coatings may be applied directly onto the External corner. We recommend before applying further products a compatibility test has to be carried out.

CLEANING OF TOOLS AND EQUIPMENT:

Tools and soiled areas should be cleaned immediately after use with water.

SUPPLIED AS:

10 pieces/carton
25 pieces/carton

SAFETY INFORMATION:

The product is not hazardous as defined in the (German) Hazardous Substances Code.

DISPOSAL:

May be disposed of as building site waste
